

Richard H. Tarr, CIA, CISA

Richard Tarr is an audit and information systems consultant and President of Richard Tarr and Associates, a consulting practice that specializes in the development of and training in integrated internal auditing functions, quality assurance reviews, application and general control reviews, strategic planning, business continuation planning, project management, and Sarbanes-Oxley testing and compliance.

A 28-year audit and IT veteran, he has extensive audit and IT experience and has managed complex development projects as well as participated in the design and acquisition of software and hardware architectures for both centralized and distributed environments. He has specialized in the development, training, and evaluation of internal audit departments in both government and industry. Mr. Tarr has also conducted over 50 quality assessment reviews and provided training and consulting services to numerous Fortune 500 companies, government agencies, and universities.

Previously with the Walt Disney Company, he initiated and developed the information systems audit function, and served as the Corporate Information Systems Audit Manager. Mr. Tarr was a senior systems engineer with Electronic Data Systems (EDS), where he designed and implemented applications for financial industry clients. He has started and managed corporate audit functions, managed information systems development project teams and has supervised programming staffs in both government and industry. He was the Manager of Quality Assurance Review for the Institute of Internal Auditors (IIA) and is has authored two publications on establishing internal audit activities.

Among the seminars Mr. Tarr teaches for MIS are *IT Auditing and Controls*, *How to Audit Automated Business Applications*, *Advanced Business Applications Auditing and Testing*, and *How to Perform a General Controls Review*. He also teaches *Fundamentals of Internal Auditing*, *Advanced Auditing for In-Charge Auditors*, *Data Driven Auditing: A Business Approach*, *Testing for Sarbanes-Oxley Compliance*, and numerous other Sarbanes-Oxley training courses.
